Interactions

- RIPE NCC Abuse Handling Training – Gerardo Viviers, RIPE NCC

- DNS Abuse Institute Reporting Tool – Graeme Bunton, DNS Abuse Institute

- RIPE Database Task Force Report

Interactions – RIPE Database Task Force Report

- Publishing the legal address of resource holders:

  "10. After weighing the pros and cons and listening to community feedback, the task force decided not to go ahead with this recommendation, as there was no clear consensus.

  However, the task force recognises the LEAs' need to access this information in a timely manner to be able to quickly respond to criminal activity on the Internet. Therefore, the task force's recommendation for legal address is that the community explore alternative solutions. The task force recommends that this work be carried out by the relevant working groups."

RIPE

Presentations

- Countering DDoS Attacks with Comprehensive ACLs Learnt from Blackholing Traffic - Matthias Wichtlhuber, DE-CIX

- Pro-active Blocking Reduces "Unwanted Traffic" to a Bare Minimum > 99% - Jeroen Leendertz, Hackers Bescherming B.V.
