

# KEEP UKRAINE CONNECTED

A community joint venture  
— for success

## Keep Ukraine Connected

February 24, 2022

This was the day everything began.  
War started in Ukraine.

Dark days for Ukrainian people,  
but also for Internet service providers

**„Our IT/ Tech Community is one big Family. We don't think in colors, we don't think in races or genders, we don't think in borders.“**

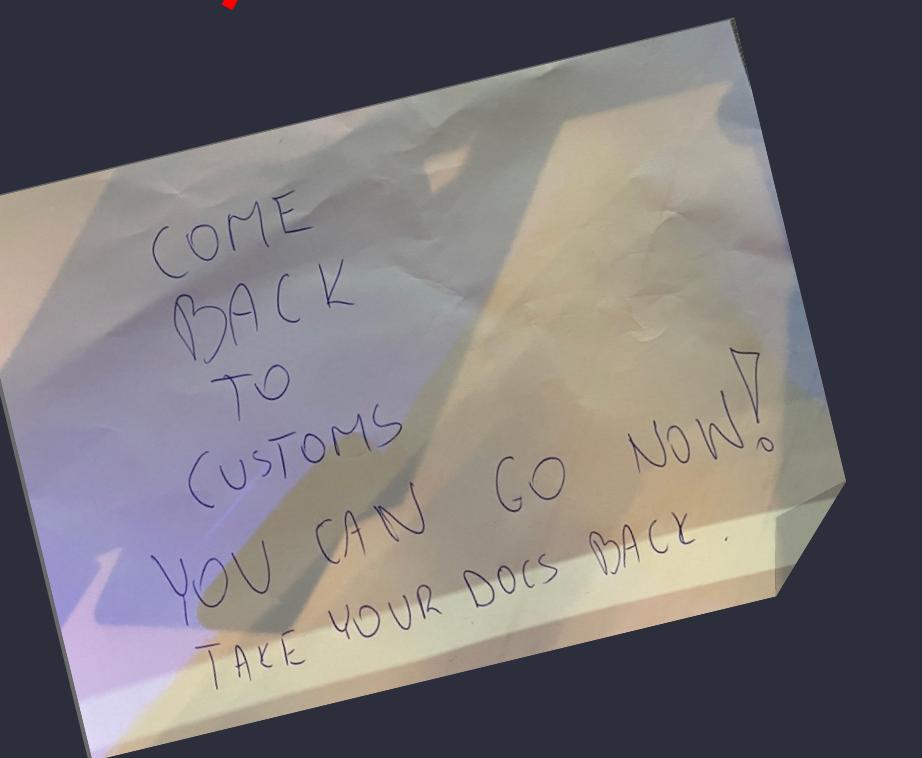

## The beginning...

When Russia invaded Ukraine, our chair René Fichtmüller didn't want to stand idly by. His first action was to get together with his friend Patrick, and help organise two truck's worth of relief (trucks courtesy of Wemme Events), which they dropped off at the Ukrainian border in the second week of March 2022.

However, of course, this was not enough.

## The first challenge:

1. Drive from Berlin to Ukraine. (**11 hrs + 2 hrs sleep**)
2. Meet strangers in a country where war is raging and unload all humanitarian goods from truck to truck and drive back as fast as possible. (**2 hrs**)
3. Then very quickly through local contacts, through gates that suddenly opened, back to the Polish side of the border. (**3 hrs sleep**)
4. Driving back home to Berlin again (**13 hrs**)
5. Done!

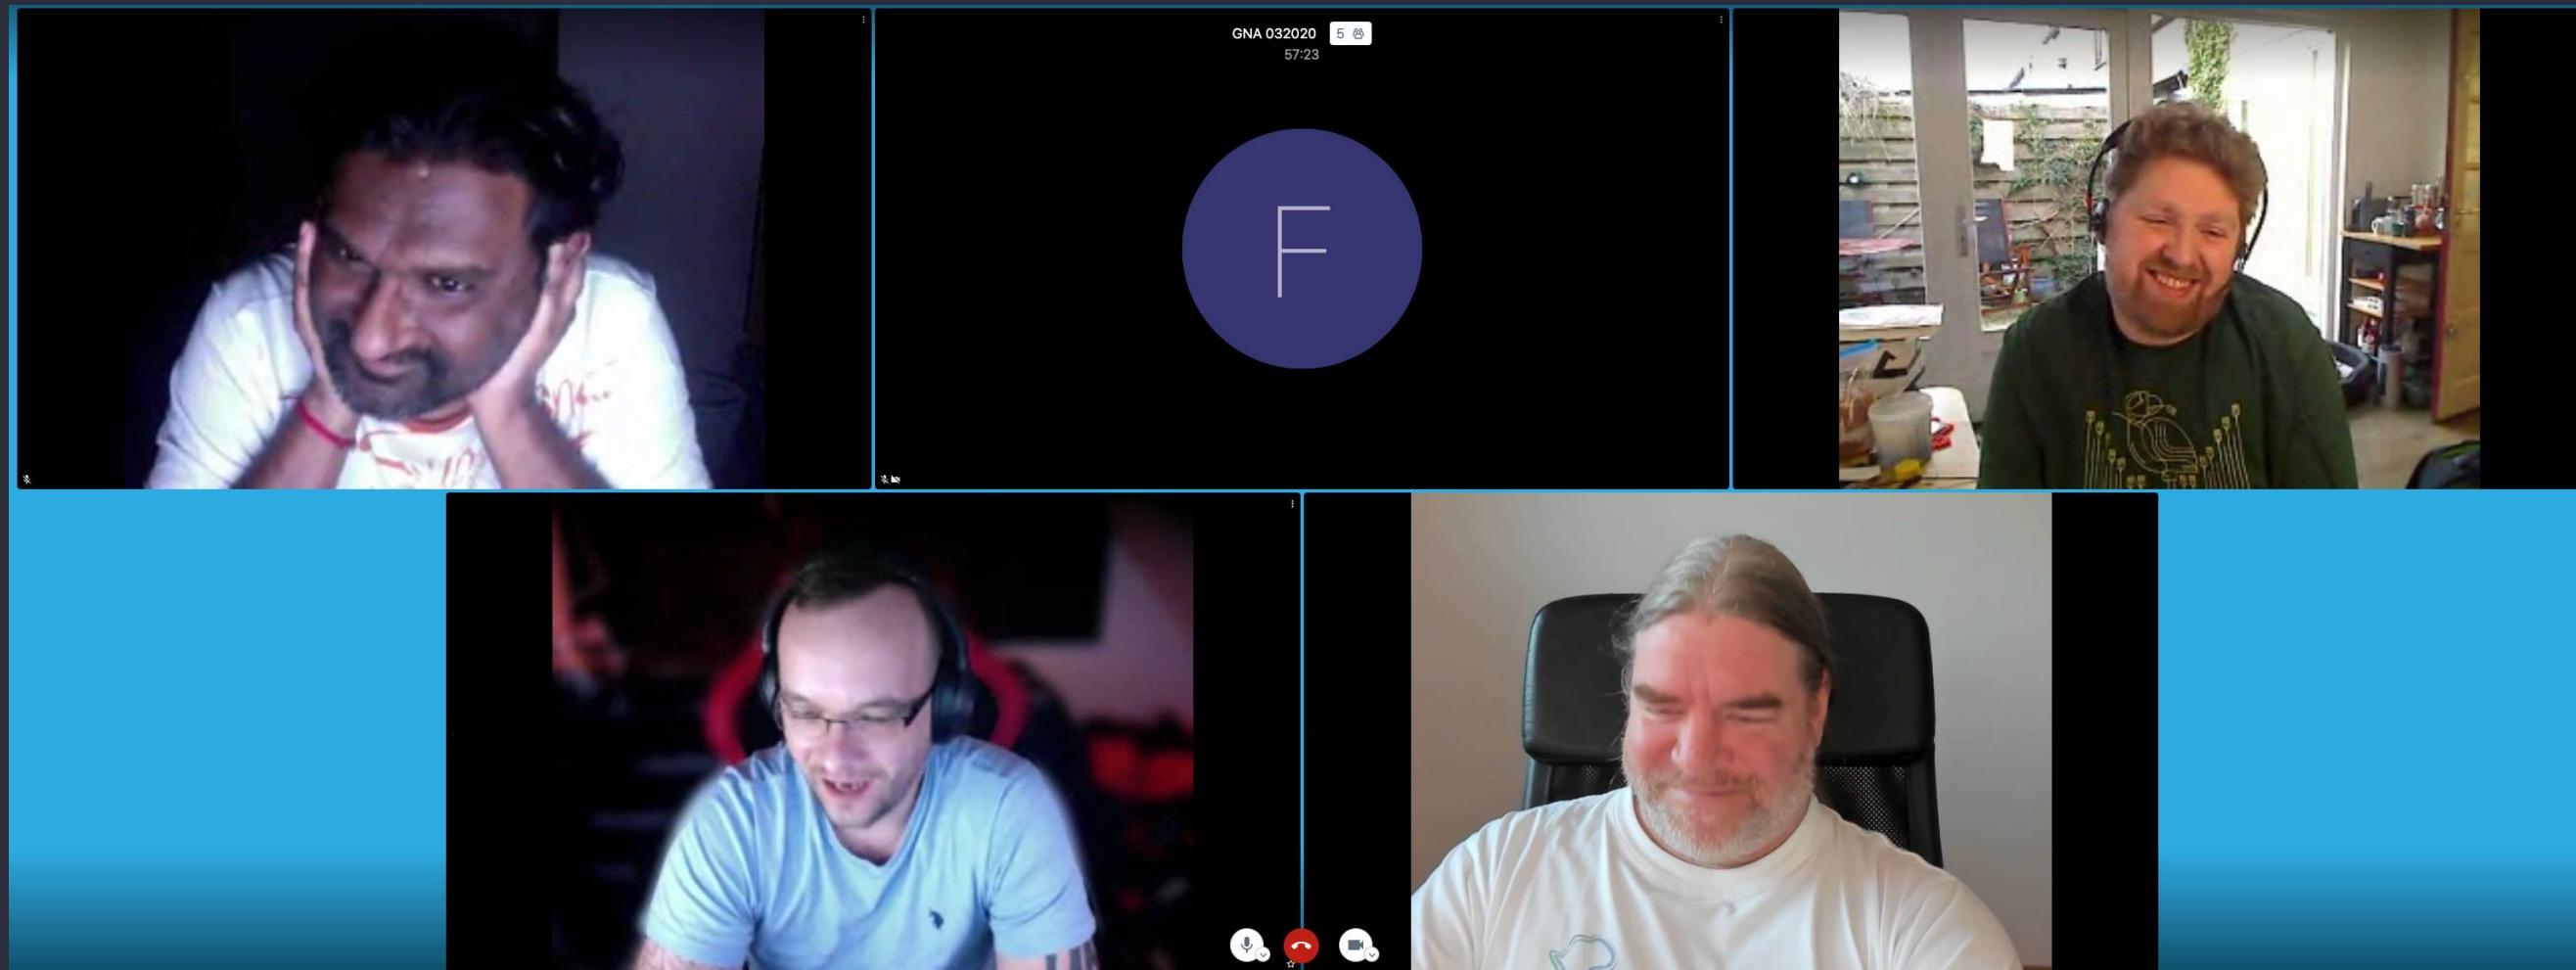

# Everything started with a Global NOG Alliance Board meeting

After Rene shared his thoughts, we all agreed that it was time to do exactly what the Global NOG Alliance was founded to do. Help Network Operators.

We called this project „Keep Ukraine Connected“

The goal of our task force: Evaluate how we can help, and find contacts in Ukraine who can tell us what is needed.

## Our Vision & Mission

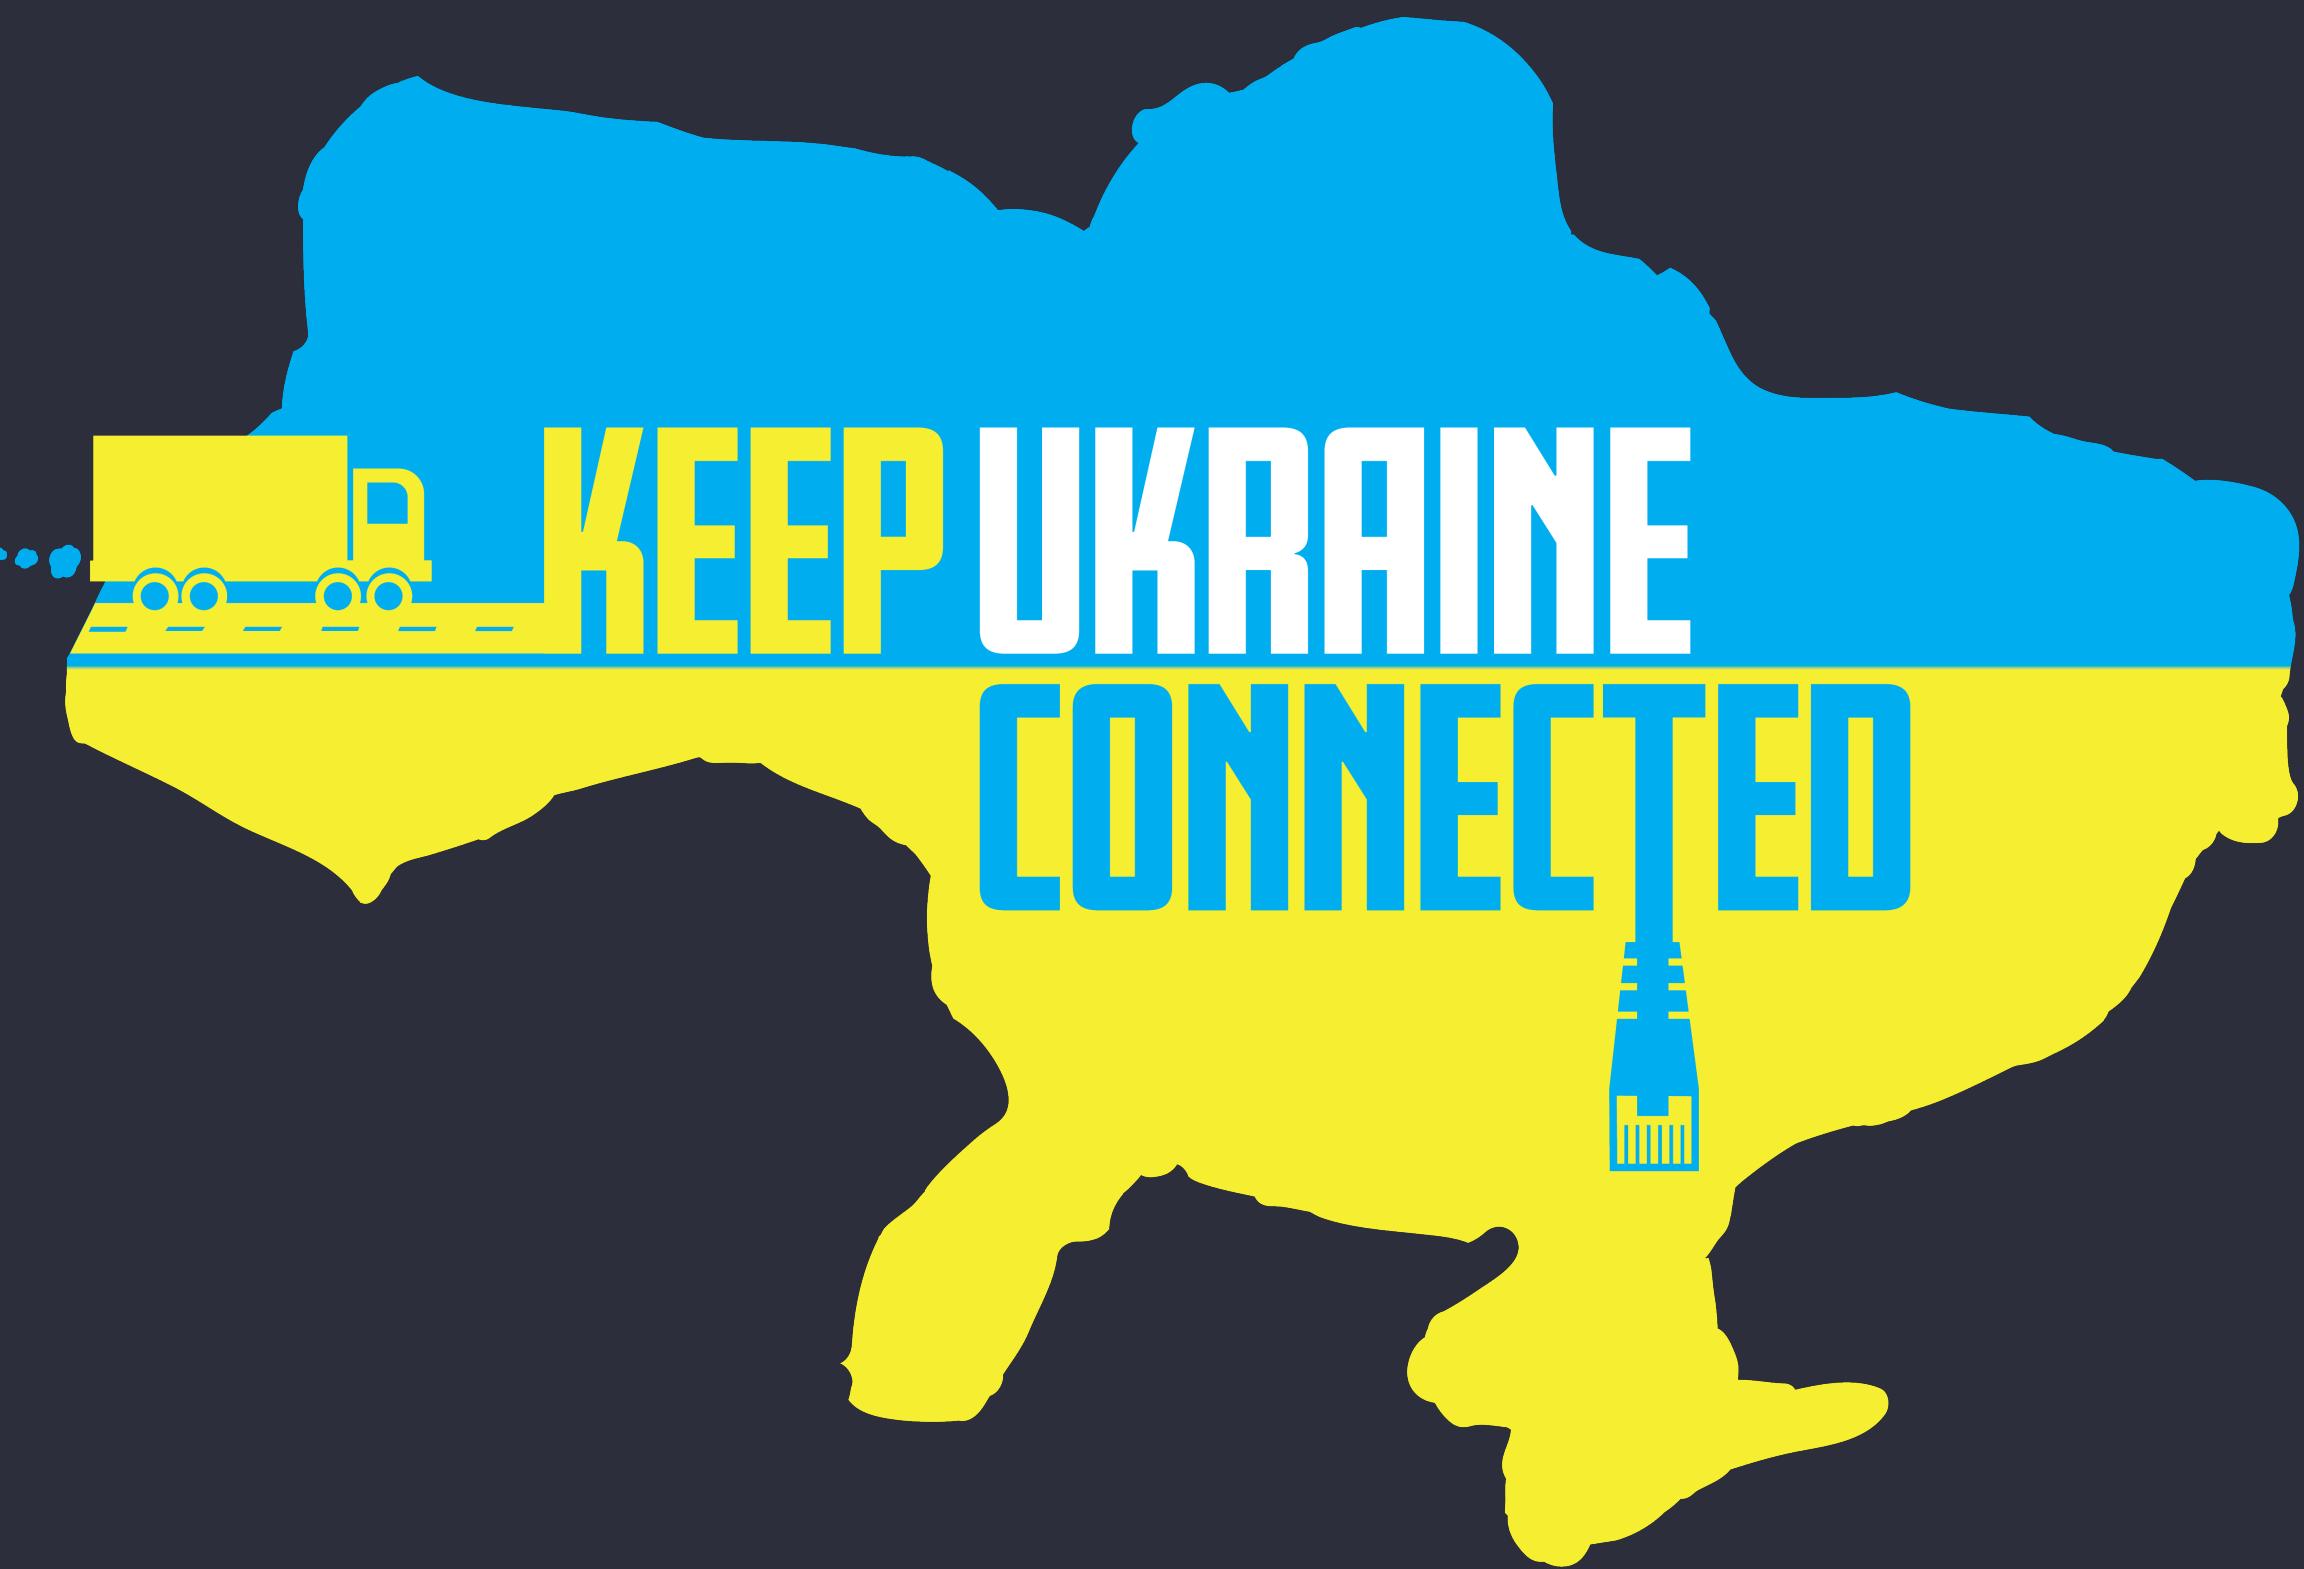

We want to be the facilitator linking the Disaster Region and the global community.

We have contacts in the community and also with the manufacturers, so we want to use these contacts to do good things.

## Strategy Development

We received many offers for donations and also many requests for equipment.

In order to be able to map this properly, we have implemented a custom made Supply & Demand Database.

# **From task force members to supply chain manager...**

The GNA Supply & Demand Database works very well. Anyone who wants to donate equipment can get a login from us, and can specify what they want to donate.

Using this database, we can manage which donations we've received. This makes it easier for us to keep track of everything, and means we can show people from Ukraine who need equipment what we have in the system.
